**Bin 1** = Add compostable materials, (example, weeds, spent plants from fall clean up, etc.)

**Bin 2** = This bin is left to heat up to kill weed seeds and break down the materials turning it into compost. Add material from bin 1 & manure to this bin.

**Bin 3** = Turn bin 2 into bin 3. It is then ready to be used by the gardeners. (please do not add new materials to this bin.)
