

## SIGNIFICANT NATURAL AREAS OF SOUTHEAST MICHIGAN PROPERTY SURVEY

The Southeast Michigan Land Conservancy is requesting your help in identifying important properties in the 7-county southeast Michigan which are worthy of protection (Livingston, Macomb, Monroe, Oakland, St. Clair, Washtenaw and Wayne counties). These may be pristine natural habitats, wetlands, farm land, or even urban parks and natural areas. Preference is weighted towards larger properties, however, smaller properties may be considered if they possess important natural or cultural features.

The goal of this survey is to identify and prioritize properties to help guide land preservation efforts in the region. The Southeast Michigan Land Conservancy intends to share this information with other conservancies, government agencies and potential funders in an attempt to develop a comprehensive land conservation strategy.

Please provide as much information as you can about each property. We will conduct further investigations as warranted. Thank you very much for your interest in land conservation!
